### Letter of recommendation

To whom it may concern,

We participated in the Polish language course from level A1 to level A2 between June 2010 and July 2011. Even though the teaching method was unusual at first, its results proved successful and were worth adapting to.

We particularly appreciated that the lessons were aligned with our individual interests and that the teachers were responsive to our workload and our various commitments in the office.

Having two different teachers taking turns who were able to speak the native languages represented in our group was certainly an additional asset that enabled us to grasp better the more challenging aspects of the language we were learning. Both Wiola and Dorota were extremely pleasant and professional.

After a year, we achieved our goal and were able to manage well everyday situations such as grocery shopping and other errands, taxi reservation, restaurant visits and small talk in the office.

We thank Wiola and Dorota for their patience, but also for sharing interesting insights of the Polish culture, and we wish them all the best for their future projects.

Yours sincerely,
